PROJECTS

Show Summary Enhancement Intellicus

Added a new feature in the product, by using this feature user will be able to perform selection of row, column level dimension to see sum, average and count just like Microsoft excel sheet.

High Speed View Revamp Intellicus

Revamped High-Speed-View in TypeScript, optimizing performance and ensuring compatibility with the existing codebase.

Buyer's Tracking Module Shiprocket's Website

Developed a Buyer Tracking Module with Angular 12 for real-time tracking of buyer activities. Implemented functionality for sellers to activate product recommendations, YouTube videos, and Instagram photos on the buyer's tracking page, resulting in increased sales. Successfully deployed the solution in a production environment for all users. Link - <https://app.shiprocket.in/seller/tracking>

Tracking Page Shiprocket's Website

Developed a Tracking Page for sellers to monitor their data, utilizing the Highcharts library to visualize data in the form of bar graphs and pie charts. The solution provided valuable insights for sellers and helped improve decision-making. Successfully deployed the solution for use by all sellers. Link-<https://app.shiprocket.in/dashboard/tracking>

Login/SignUp Shiprocket's Website

Collaborated with senior developers to design and develop a secure Authentication system. Played a key role in designing the user interface and experience. Successfully deployed the solution, providing a reliable and secure authentication mechanism for all users.
